INSTRUCTIONS FOR CONTAINER TRUCK DRIVERS CALLING MUSSALO TERMINAL

There is an access control system in use in Kotka Mussalo Container Terminal in order to improve the security and to simplify the procedure in connection with calls by container trucks.
Please follow these instructions when visiting the terminal:

1. Make the necessary container tasks for your truck at Steveco's Truck Service Point, at the self-service kiosk or on the truck Check Net application.

2. Proceed to the port area and the Container Terminal. On signs text "C-laituri" (quay C).

3. Drive to the terminal gate and let the reader device read the call-specific barcode document you have received from the Truck Service Point or the self-service kiosk, or the truck-specific RFID card.

4. Proceed to the interchange area and drive to one of places reserved for hoisting.
   - Let the reader device on the left side read the barcode document or the RFID card. After this you have to stay in the place you have chosen.
   - There are no readers in the depot interchange area, the hoists are activated automatically.

5. Let the reader device read the barcode document or the RFID card and leave the terminal through the terminal gate.
   In case you have claims concerning the container you have received, please contact the container coordinator tel. +358 44 2323 526.

6. In case a call at the Customs is necessary, please follow the guided route. Take the documents to the Customs authorities and wait while they are handled. After that the Customs will give you the permission to leave.

7. Drive to the exit gate. Provided that your call has been accepted at every phase, the access control shall open the beam and you can leave the port area.
